EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dr. Michelle S. Glasky, Applicant's Agent on August 21, 2008 at ~5:30 pm EST.

The application has been amended as follows:

(1). Delete the current title of the application and replace with the following:

"A method for the delivery of monomeric or dimeric insulin complexed to diketopiperazine microparticles"

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicants' claimed method was found to be free of any teaching or suggestion in the prior art, based upon Applicants' claim amendments, submitted May 20, 2008, specifying how the insulin-complexed diketopiperazine microparticles administered in the claimed method were obtained and the comparison results submitted under 1.132 declaration by Applicants on October 9, 2007. Applicants' declaration data demonstrates a difference in kind in the properties of the insulin-complexed diketopiperazine microparticles administered in the instantly claimed method and the insulin-encapsulated diketopiperazine microparticles disclosed in the prior art and in Applicants' previous work. For example, the insulin-complexed diketopiperazine microparticles of the

instant invention maintain the stability of the insulin at much higher levels than the prior art insulin-encapsulated diketopiperazine particles upon storage at 40 degrees Celsius and 75% RH (See Figure 1 on page 7 of Applicants' 1.132 declaration submitted on 10/9/07). Thus, there is a clear and non-obvious difference between the insulin-complexed diketopiperazine particles made by the steps recited in Applicants' claims (i.e. (a) providing pre-formed microparticles of diketopiperazine in a suspension comprising a solvent, (b) adding insulin to said suspension; and (c) removing solvent from said suspension) and the insulin-encapsulated diketopiperazine particles described in the cite prior art of record and in Applicants' previous work.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James H. Alstrum-Acevedo whose telephone number is (571) 272-5548. The examiner can normally be reached on M-F, 9:00-6:30, with every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (571) 272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
